Food and Flavor Henry Finck 2001-01-01 Henry Finck's aim in his 1913 work ""Food and Flavor"" is to introduce gastronomy to Americans, to show that America can be an even more gastonomic nation than France. Though an understanding of the ""importance to health and happiness of raising only the best food stuffs, cooking them in savory ways and eating them with intelligence and pleasure,"" Finck aims to reinvigorate the food culture of an America that had given up much of its old-fashioned methods in favor of ""cheaper chemical preservatives."" Finck's argument for cultivating an appreciation for natural, whole American grown and cooked foods is thoroughly modern in its concern.

Science and Empires P. Petitjean 2012-12-06 SCIENCE AND EMPIRES: FROM THE INTERNATIONAL COLLOQUIUM TO THE BOOK Patrick PETITJEAN, Catherine JAMI and Anne Marie MOULIN The International Colloquium "Science and Empires - Historical Studies about Scientific De velopment and European Expansion" is the product of an International Colloquium, "Sciences and Empires - A Comparative History of Scien tific Exchanges: European Expansion and Scientific Development in Asian, African, American and Oceanian Countries". Organized by the REHSEIS group (Research on Epistemology and History of Exact Sciences and Scientific Institutions) of CNRS (National Center for Scientific Research), the colloquium was held from 3 to 6 April 1990 in the UNESCO building in Paris. This colloquium was an idea of Professor Roshdi Rashed who initiated this field of studies in France some years ago, and proposed "Sciences and Empires" as one of the main research programmes for the The project to organize such a colloquium was a bit REHSEIS group. of a gamble. Its subject, reflected in the title "Sciences and Empires", is not a currently-accepted sub-discipline of the history of science; rather, it refers to a set of questions which found autonomy only recently. The terminology was strongly debated by the participants and, as is frequently suggested in this book, awaits fuller clarification.

Decarbonising the Built Environment Peter Newton 2019-06-07 This book focuses on the challenge that Australia faces in transitioning to renewable energy and regenerating its cities via a transformation of its built environment. Both are necessary conditions for low carbon living in the 21st century. This is a global challenge represented by the United Nation's Sustainable Development Goals and the IPCC's Climate Change program and its focus on mitigation and adaptation. All nations must make significant contributions to this transformation. This book highlights the new knowledge and innovation that has emerged from research projects undertaken in the Co-operative Research Centre for Low Carbon Living between 2012 and 2019 – an initiative of the Australian Government's Department of Industry, Science and Technology that is tasked with responding to the UN challenges. Four principal transition pathways were central to the CRC and provide the thematic structure to this volume. They focus on technology, buildings, precinct and city design, and human behaviour – and their interactions.

Honeybee Craig Silvey 2020-09-29 The highly anticipated new novel by the bestselling author of Jasper Jones. 'Find out who you are, and live that life.' Late in the night, fourteen-year-old Sam Watson steps onto a quiet overpass, climbs over the rail and looks down at the road far below. At the other end of the same bridge, an old man, Vic, smokes his last cigarette. The two see each other across the void. A fateful connection is made, and an unlikely friendship blooms. Slowly, we learn what led Sam and Vic to the bridge that night. Bonded by their suffering, each privately commits to the impossible task of saving the other. Honeybee is a heartbreaking, life-affirming novel that throws us headlong into a world of petty thefts, extortion plots, botched bank robberies, daring dog rescues and one spectacular drag show. At the heart of Honeybee is Sam: a solitary, resilient young person battling to navigate the world as their true self; ensnared by loyalty to a troubled mother, scarred by the volatility of a domineering stepfather, and confounded by the kindness of new alliances. Honeybee is a tender, profoundly moving novel, brimming with vivid characters and luminous words. It's about two lives forever changed by a chance encounter -- one offering hope, the other redemption. It's about when to persevere, and when to be merciful, as Sam learns when to let go, and when to hold on.

The Old School P.M. Newton 2010-06-28 'Two things you want to remember about the good old days, Ned. They weren't that good and they're not that old.' Detective Nhu 'Ned' Kelly is in way over her head. Not every member of the New South Wales police force has welcomed the young, half-Vietnamese woman into a job where the old school still makes the rules. When two bodies are discovered in the footings of an old Bankstown building, Ned catches the case. As she works to uncover the truth, she is drawn into Sydney's dirty past – and the murky history of her own family. Bit by bit she gains ground on the murderer, just as he's gaining ground on her. Familiar faces begin to look suspicious. How close to home will she have to look? It's time for Ned to decide who is on her side – and who wants her dead. Gritty and sharp, The Old School is a gripping new take on crime fiction by former NSW police detective P.M. Newton. 'P.M. Newton's bitter-sweet thriller is an arresting debut: astonishingly accomplished and as authentic as a .38 bullet wound. File between D for Dishar and T for Temple and sweat on the sequel.' Andrew Rule 'The writing is razor-sharp and the dialogue sizzles with tough-as-nails authenticity. Newton is a writer to watch.' Matthew Reilly 'Relentless... What a multi-layered, powerful piece of writing. This novel puts P.M. Newton in the company of Marele Day, Gabrielle Lord and Peter Temple.' Graeme Blundell 'All the elevated anxiety, pace and snippy dialogue of classic crime fiction, yet it somehow comes across as a true story... The Old School is a cracker. There's a new voice on the beat.' Weekend Australian 'A gripping crime novel that sweeps up the reader in its enthralling multi-layered plot, powerful characters and spot-on descriptions of Sydney... A tough and authentic novel. The Old School is already shaping up as the year's best debut crime novel.' Canberra Times

Real Estate Development Matrix Daniel B Kohlhepp 2018-02-02 This book presents a new way of thinking about, teaching, learning, and practicing real estate development. Real Estate Development Matrix describes the process in a two-dimensional model and presents seven Development Stages which form the horizontal axis, and eight sets of Development Tasks which form the vertical axis to define a 56-cell matrix. In each cell, money is spent and risks are taken to achieve certain tasks and thereby create (or destroy) value. This holistic process considers the entire life cycle of real estate from its "green field" inception to its "brown field" state. The book is written by a real estate developer and academic, and the presented material is conceptual, practical, and non-technical. Jargon has been minimized as much as possible as the author introduces an entirely new model for real estate development that is both academically authoritative and developed in practice. It is aimed at a general professional audience participating in the development process, but equally the book is ideal for use as a textbook in undergraduate and graduate courses in real estate development, and an excellent supplemental text for business courses discussing real estate finance and investment. It may also be used as a textbook for professional courses, workshops, or seminars in real estate development. The book is supported by an interactive website at <http://realestatedevelopmentmatrix.com/>

Seev Hirsch, International Business Review Multinational Enterprises and the Global Economy has become a classic in international business. . . Yet , the book s second edition is even better than the first, in part because of Professor Dunning s wise decision to choose Dr Lundan as his co-author and to draw upon her deep knowledge of various strands of research on business government relations and the societal effects of firm behaviour. . . In addition to being a remarkably useful reference book, Multinational Enterprises and the Global Economy is the first book any IB doctoral student should read to understand the significance and richness of IB scholarship as it has developed over the past 50 years. Alain Verbeke, Journal of International Business Studies The second edition of Multinational Enterprises and the Global Economy provides unparalleled coverage not only of the literature relevant to IB research but also of the evolution of IB in the world economy. Dunning and Lundan offer powerful insights into the societal effects of MNEs and the role of business government relations in the IB context. Journal of International Business Studies This wonderful book offers the definitive synthesis of the modern literature on the economic aspects of international business. It is encyclopedic yet full of incisive insights. It is a creative masterpiece which unbundles the DNA of the multinational enterprise and shows how it is the cornerstone of the field of international business. Alan M. Rugman, University of Reading, UK The rise of the multinational enterprise, and the consequent globalisation of the world economy, was arguably the single most important phenomenon of the second half of the twentieth century. This magisterial book, written by two leading authorities, examines this phenomenon in depth. It explains how foreign investment by multinationals diffused advanced technologies and novel management methods, driving productivity growth in Europe, Asia and North America; however, economic inequalities were reinforced as rich countries attracted more foreign investment than poor ones. This new edition of a classic work is not only an authoritative guide to contemporary multinational business, but a major historical resource for the future. Mark Casson, University of Reading, UK This thoroughly updated and revised edition of a widely acclaimed, classic text will be required reading for academics, policymakers and advanced students of international business worldwide. Employing a distinctive and unified framework, this book draws together research across a range of academic fields to offer a synthesis of the determinants of MNE activity, and its effects on the economic and social well-being of developed and developing countries. Unique to the new edition is its focus on the institutional underpinnings of the resources and capabilities of MNEs, and the role of MNE activity in transmitting and facilitating institutional change. Since the initial publication of this book more than a decade ago, the economic, managerial and social implications of globalisation and technological advancement have become even more varied and prominent. Accompanying these developments, there has been a rise in scholarly interest in interdisciplinary research addressing the important challenges of an ever-changing physical and human environment. Drawing on articles and books from international business and economics, as well as economic geography, political economy and strategic management, a systematic overview of the developments in scholarly thinking is prese

[The New Urban Frontier](#) Neil Smith 2005-10-26 Why have so many central and inner cities in Europe, North America and Australia been so radically revamped in the last three decades, converting urban decay into new chic? Will the process continue in the twenty-first century or has it ended? What does this mean for the people who live there? Can they do anything about it? This book challenges conventional wisdom, which holds gentrification to be the simple outcome of new middle-class tastes and a demand for urban living. It reveals gentrification as part of a much larger shift in the political economy and culture of the late twentieth century. Documenting in gritty detail the conflicts that gentrification brings to the new urban 'frontiers', the author explores the interconnections of urban policy, patterns of investment, eviction, and homelessness. The failure of liberal urban policy and the end of the 1980s financial boom have made the end-of-the-century city a darker and more dangerous place. Public policy and the private market are conspiring against minorities, working people, the poor, and the homeless as never before. In the emerging revanchist city, gentrification has become part of this policy of revenge.
